CARE

Please note copper is a soft material and must be handled with extra care. For maintenance, only use lint-free dust cloths and wear the white cotton gloves, provided, if handling it.

To polish the mirror, use a good quality nonabrasive copper cleaner and extra soft dust cloths (lint-free).

When polishing the mirror, always go with the direction of the grain. This can be identified on viewing the surface under a light source. Do not apply pressure on persistent marks. Remove these using repeated gentle motions and reapplying the copper cleaner.
