

LEE BROOM

Less than a decade after founding his namesake brand, British designer Lee Broom has become one of the industry's most prolific and successful names. The UK designer brings an ultra contemporary aesthetic to lighting and furniture as well as over 40 retail and hospitality projects. Broom's particular aesthetic – inspired by his travels and the kinetic energy of urban life – feels at once new and familiar, earning him multiple awards and accolades from the global design establishment. A Lee Broom crystal bulb is a great example of his unique design.
